

Turn-Key Cooling Tower Solutions

Custom Towers • Rentals • Parts • Service

**AMERICAN
COOLING
TOWER, INC.**

Your single source supplier for all your cooling tower needs

www.AmericanCoolingTower.com

OUR BACKGROUND

American Cooling Towers' roots within the cooling tower industry began more than 80 years ago, when the family business, Johnson Tank & Towers, was founded in Southern California. The company focused on providing a variety of services that included repair work and installation of wood water tanks and cooling towers within California, Arizona, and Nevada.

Today, American Cooling Tower continues to be a family owned and operated company, providing custom engineered services for the cooling tower industry. Our company revolves around four strategic divisions that work together to provide customers with turn-key solutions for cooling tower applications nationwide. Whether you have a need for reconstruction services, new or replacement tower designs, temporary cooling, or after-market parts, American Cooling Tower is a single source supplier for all of your cooling tower needs.

Specializing in:

HVAC

Military

Industry

Hospitals

Commercial

Government

Process & Power

Universities & Colleges

NEW TOWERS

American Cooling Tower offers both custom built field erect and packaged cooling tower designs. These projects might entail replacing an existing unit that has become inefficient or inoperable, adding additional cooling capacity to meet growing demands, or design & build services for new installations.

Field Erect Towers

- Counter-Flow or Cross-Flow Designs
- Fiberglass, Wood, or Concrete Structures
- Single or Multiple Cell Designs
- Complete Customization

Packaged Towers

- Factory Assembled
- Single or Multiple Cell Units
- Counter-Flow or Cross-Flow Designs
- Stainless Steel, Galvanized, or Fiberglass Materials

SERVICE

American Cooling Tower has always put the quality of our workmanship at the forefront of our business. Customers expect the best from a service company and therefore it is up to our staff to ensure that this is what you receive each and every time American Cooling Tower performs a project. Our experienced in-house field crews, supervisors, and project managers, make sure that every job we perform is done with the highest level of workmanship. We utilize only the best components on the market and perform work with safety in mind, all the time.

- Field Erect or Packaged Cooling Tower Maintenance
- Minor Repairs or Complete Reconstruction
- Mechanical Component Upgrades
- Thermal Component Upgrades
- Free Tower Inspections
- OSHA Compliant
- LACC Certified
- RSO Certified

RENTAL TOWERS

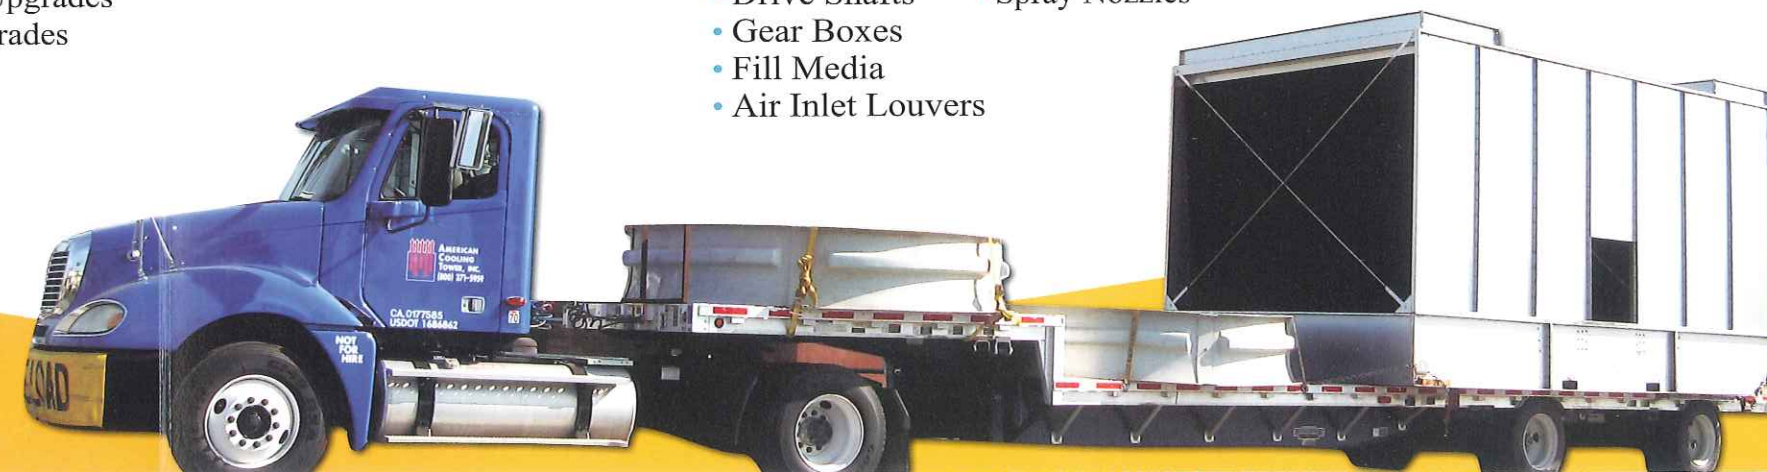

American Cooling Tower's rental fleet is designed to provide supplemental, seasonal, or emergency cooling to customers regardless of their location. Incorporating our own custom designed and built towers, the American Cooling Tower rental fleet is capable of more than 100,000 tons of cooling capacity. Our stainless steel designs are built to perform even in the most rugged site conditions while ensuring that setup, tie-in, and start-up are easy and quick. Our rental fleet offers three nominal single cell designs which can be used as standalone units or combined to meet larger capacity requirements. American Cooling Tower stocks a variety of accessories such as pumps, hoses, cables, and more to ensure that we have what you need, when you need it. American Cooling Tower has provided rental services to a variety of markets over the past 10 years such as hospitals, schools, hotels, high-rises, sporting arenas, refineries, and power plants.

- Single Cell Sizes (up to 1,000 nominal tons)
- Temperature Controlled Multi-Fan Systems
- All Stainless Steel Construction
- Contingency Planning
- Planned Outages
- Emergency Cooling
- Supplemental Cooling
- Over 100,000 Tons of Capacity

PARTS

American Cooling Tower offers customers with complete access to any cooling tower component regardless of manufacturer. Our after-market parts include, but are not limited to the following:

- Fans
- Motors
- Drive Shafts
- Gear Boxes
- Fill Media
- Air Inlet Louvers
- Distribution systems
- Drift Eliminators
- Spray Nozzles
